

**Dr. Garry Lunn**  
GENERAL DENTISTRY  
MICROSCOPE ASSISTED  
PRECISION DENTISTRY

## Spring Newsletter

From August forward we will be open Saturdays and will be extending our week day hours. We hope to better accommodate your schedules with the extended hours. Our dental hygienist and New associate will be available at these times. If you are interested in taking the opportunity of these extended hours, or a weekend time, please contact our receptionist.

We have gone all digital in our radiographic department. This means, we will reduce the radiation exposure in half compared to film. We previously were using high speed film which allowed for minimal exposure dosages, but this is even an improvement on film. We have immediate results on the computer screen and we no longer need developing solutions, so it is more environmentally friendly, all this at the same fee. The digitals are much more diagnostic as well.

Anita our dental hygienist will be off on a pregnancy leave starting in July this year. We have been interviewing candidates and have found a replacement. After screening a number of hygienists with working interviews we feel we can ensure the same care and professional service you are accustomed to.

Also Amandeep, my dental assistant, has now returned from her maternity leave.

Please check out our web-site [www.dentist-lunn.com](http://www.dentist-lunn.com) to see our latest posting on "Erosion of tooth structure" or just click here. Is what you are drinking or eating, wearing away your teeth? See a list of common foods and beverages acidity.
