

~*Happy Holiday Season from Dr Lunn and Staff*~

We hope this message finds you in good cheer and health.

As more and more people are using electronic communications to connect, we decided to utilize email to inform you of some new things in our office.

We are now offering treatments with **Botox**. Yet another way to diminish those dynamic wrinkles to give your face a more relaxed and refreshed appearance. It smoothes out frown lines by preventing muscles from contracting into a wrinkle. Check out our web-site www.dentist-lunn.com for Frequently asked Questions and Answers or call our office to set up a *free* cosmetic consult to see if you are a candidate for **Botox Cosmetic**.

Also in recent years Dr. Lunn has been incorporating orthodontics into the practice. Not only the traditional brackets and wires but also the clear aligners called **Invisalign**. The advantage being you are able to clean your teeth more effectively as the liners are removable and no aches or pains from tissues being abraded from brackets. They are hardly visible. This is a great way to touch up those minor tooth misalignments or fix up the post orthodontic relapse. And you can eat whatever you want. Check out our website www.dentist-lunn.com for more information. Or call us to have a consult to see if you qualify.

Finally, there is a Cavity Fighting Herbal Lollipop on the market; see our web site for more information or go to www.drjohns.com to find out more.

Thank you for trusting us as your dental professionals, we appreciate your patronage and referrals.
